Title: User Interface Start Page

— 502

Display a user interface start page having a user-identifiable indicator associated with a user of a computing system to indicate that the user is logged-on to the computing system

---- 504

Display user-selectable controls on the user interface start page that are included in one or more regions of a desktop page which is displayed after a transition from the user interface start page

- 506

Display a start control on the user interface start page that is user-selectable to start multiple application programs together at approximately a same time after the transition to the desktop page

- 508

Display time-based and/or date-based information on the user interface start page which corresponds to an environment associated with the user

Display a date-based user-selectable control on the user interface start page which corresponds to an application program associated with the user

- 512

Display a logoff control on the user interface start page to logoff the computing system and initiate a transition to a logon page that includes selectable logon controls for users of the computing system

- 514

Display a settings change control on the user interface start page to change display settings of the user interface start page

- 516

Display a desktop selection control on the user interface start page to select from one or more desktop pages each corresponding to the user and each having a unique display configuration
